WHOLESALE PRICE LIST

SEASON 1937-1938

November 15, 1937

PLEASE NOTE

All summer prices and other quotations not accepted to date are hereby cancelled.

Prices. All prices herein are strictly net, to the trade only and for goods at our nursery unless otherwise stated. This list means what it says both as to prices and terms and we do not deviate from it.

Specimens. Prices herein are for average good plants but selected specimens will be charged for extra at actual value.

Terms. To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

Quantities. Five or more plants of one kind and size will be supplied at 10 rate; 25 or more at 100 rate; for less than 5 of one kind and size add 20% to 10 rate.

Grading. Plants that are wider than tall are graded by width.

Packing. At cost as usual, including paper pots if used. Plants will be packed to secure lowest possible freight classification consistent with the nature of the goods shipped. Packing free if cash comes with order.

Pots. Prices of pot-grown stock do not include pots and unless otherwise instructed plants will be shipped without them. If wanted in the pots they will be charged for at cost, but may be returned and credit will be given.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

Other Stock. This list covers stock for shipment from our San Jose Nursery. We also act as selling agents for several other growers so shall be glad to have inquiries for any material grown on the Pacific Coast but not listed herein.

Complaints. Must be made within 10 days after buyer receives the goods.

This firm is a member of

CALIFORNIA ASSOCIATION OF NURSERYMEN
PACIFIC COAST ASSOCIATION OF NURSERYMEN
CENTRAL CALIFORNIA NURSERYMEN'S ASSOCIATION
CALIFORNIA HORTICULTURAL SOCIETY
ROYAL HORTICULTURAL SOCIETY (of England)

New Items

We are rapidly becoming known all over the country as headquarters for new and rare things in woody plants. There is good reason for this as we have an idea that during the last four years we have imported from abroad under government permit a greater assortment of novelties than any other nursery. On some of these things propagation is very slow and it may be several years before we can work up sufficient stock to justify offering them in a wholesale list but they will be made available as rapidly as possible. In addition to this we annually import from many foreign countries seed of new, rare and presumably beautiful trees and shrubs, many of which are entirely unknown in this country. In fact we are doing all in our power to make this the outstanding nursery of the country for new and rare woody plants. We limit our production to these and leave annuals, herbaceous perennials and "bedding plants" to others.

For the convenience of those who are interested in this class of material we give below a list of most of the new items that are offered in this price list. Included are a few things which are not strictly new but are so extremely scarce that their presence in a list of this sort is amply justified. All are priced and most are briefly described in this list. If further information is wanted about any of them we will gladly give it on request.

CONIFERS

CEDRUS deodara compacta
CEDRUS deodara fontinalis
CUPRESSUS cashmeriana

BROAD LEAVED EVERGREEN SHRUBS

ABELIA floribunda
ABELIA grandiflora sherwoodi
ASTER fruticosa
BERBERIS corallina compacta
BERBERIS gracilis
BERBERIS umbellata
BRACHYSEMA lanceolatum
CHIRONIA linoides
CHORIZEMA varium
CISTUS corbariensis
CISTUS purpureus
CISTUS Silver Pink
COLQUHOOUNIA vestita
COTONEASTER bullata
COTONEASTER glabrata
COTONEASTER glaucophylla
COTONEASTER rubens
CRINIDENDRON hookeri (Tricuspidaria lanceolata)
CYTISUS kewensis
CYTISUS Mitchell Brooms
CYTISUS European Hybrids
DEFONTAINEA spinosa
EHRETIA elliptica
ESCALLONIA donardensis
ESCALLONIA edinensis
GREVILLEA crithmifolia
GREVILLEA obtusifolia
HOHERIA populnea osborni
ILEX aquiperni
ILEX ciliospinosa
LAVATERA olbia
LEPTOSPERMUM scoparium fl. pl.
MYROXYLON senticosum
MYRTUS communis minima
NANDINA domestica alba
NERIUM Aunisien
NERIUM Com. Barthelemy
NIEREMBERGIA hippomanica
OSMANTHUS armatus
OSMANTHUS delavayi
PHOTINIA arbutifolia chrysocarpa
PHOTINIA arbutifolia macrocarpa
PROSTANTHERA rotundifolia
PSORALEA spp. ("Blue Brooms")
PYRACANTHA yunnanensis macrocarpa

CLIMBERS

AMPELOPSIS laetevirens
BEAUMONTIA grandiflora
JASMINUM stephanense
PILEOSTEGIA viburnoides
WISTERIA floribunda longissima alba
WISTERIA floribunda Geisha
WISTERIA floribunda Royal Purple

“Garden Aristocrats 1938”

This is the title of a descriptive booklet that we get out annually in January. It contains considerably more descriptive material than this list and also includes quite a number of very new things of which the present supply is too small to be included in a wholesale list.

In January we will mail a copy of this booklet to every nurseryman in Washington, Oregon, and California whose name is on our mailing list. We shall be glad, upon request, to send a copy to any address in the world.

Lining Out Stock

For your convenience we have assembled this material at the end of this list. Much of it is scarce.

Abbreviations

It is important for buyers to know whether they are getting seedlings or cuttings, etc., so we have shown how every item was propagated using the following abbreviations:

B—budded
C—cuttings

G—grafted
S—seedlings

Conifers

Unless otherwise stated all plants in this section will be balled at prices quoted.

NOTE: A large portion of our conifers are grafted on seedling roots which gives them a far better root system than when grown from cuttings.

Novelty

Abelia Floribunda

RED ABELIA

Habit spreading with erect shoots; maximum height probably not over 4 ft., leaves evergreen, small and handsome; flowers enormous compared with other Abelas, trumpet-shaped and from $1\frac{1}{2}$ to 2 inches long (illustration is slightly less than natural size); color bright rose red.

Bears an unbelievable profusion of bloom and well deserves the name "floribunda."

Experience has shown that it prefers moisture and shade and probably will not thrive well in hot dry climates except when given plenty of shade and water.

As yet we are unable to say how much cold it will stand but believe it will be nearly if not quite as hardy as other Abelas.

 gracilis (N. calycina)			
4 in. pot 1 to 1½ ft. C.....	.30	.25	
 hippomanica (new)			
An unusually fine novelty. Makes only a very small plant suitable for rock gardens, small borders or pot culture. Grows only a few inches tall, somewhat wider and covers itself with deep blue flowers the year round except winter. Plants offered will not be ready until early April. Demand will exceed supply so better order now.			
2½ in. pot C.....	.20	.15	
 OSMANTHUS aquifolium, HOLLY OSMANTHUS			
Often mistaken for a Holly. It does not seem to be generally known that it bears white blossoms having a rich, spicy odor.

8 to 10 ft. B.		1.50	
4 to 6 ft. B.		.90	
floribunda purpurea			
6 to 8 ft. B.		1.20	
spectabilis grandiflora			
4 to 6 ft. B.		.90	

FLOWERING APRICOTS

NOVELTY

Rosemary Clarke

This is a seedling of our own raising and is the only good double white form of *Prunus mume* that we have ever seen. The flowers are large, snow white, richly fragrant, and borne all around the branches. Its beauty is further enhanced by the red calyx. It is not only a gorgeous thing for the garden but should be of great value to cut flower growers on account of its earliness, coloring, and fragrance. First time offered.

5 to 6 ft. G.	1.25
4 to 5 ft. G.	1.00
3 to 4 ft. G.	.75

DWARF VARIETY

Bonita

This is a miniature and in fact is a shrub rather than a tree. Growth is very slow. Flowers are double and very deep red.

2 to 3 ft. B.	.55
1½ to 2 ft. B.	.40

Other erect growing varieties are sold out for this season.

WEEPING VARIETIES

Weeping Single Pink

Weeping Single Red

Good heads on 4 ft. stems B.	1.00
------------------------------	------

FLOWERING CHERRIES

We grow the most complete assortment of Japanese Flowering Cherries in the U.S.A., but advance sales have been so heavy that we are not sure at this time just what we have unsold. If interested, write us after January 1st, and we will then send list of what is available with prices.

FLOWERING PEACHES

Mandarin

This delightful dwarf variety is only a shrub unless top-grafted. Foliage dark and nearly evergreen but it drops in time to avoid obscuring the solid mass of double red flowers whose color is probably the richest shade of red in the whole range of Flowering Fruit trees.

Budded at 1 ft.	1.00	.60
Seedlings, gal. can 8 to 12 in.35	.30

Assorted Varieties

A 6 to 7 ft. B.	.65	.60

DECIDUOUS SHRUBS

CHAENOMELES (Cydonia) (continued)	N. B.	10 rate	100 rate
Following Varieties Are All Grafted.			
<i>japonica corallina</i>			
Exceptionally fine. Rather slow growing and makes a moderate sized shrub. Flowers are coral or salmon-apricot, borne in great profusion over a very long period. Always greatly admired.			
3 to 4 ft. G.....		1.00	.85
2 to 3 ft. G.....		.70	.60
1½ to 2 ft. G.....		.60	.50
<i>lagenaria</i> (formerly <i>Cydonia japonica</i>)			
JAPANESE SCARLET FLOWERING QUINCE			
6 to 7 ft. G.....		1.50	1.25
All smaller sizes are sold for this season.			
<i>lagenaria Double Vermilion</i>			
1 to 1½ ft. G.....			.60
<i>superba perfecta</i>			
The flowers of this beautiful miniature variety are creamy lemon tinted pink, gradually changing to rose. Growth is slow and very dwarf. Blooms freely in the fall as well as in the spring.			
1½ to 2 ft. G.....		.60	
1 to 1½ ft. G.....		.50

TRIPTERYGIUM regeli (new)			
The late Ernest Wilson said: "This is a beautiful vine with long, red-brown, prominently spotted stems, broad bright green, wrinkled leaves and large terminal clusters of small white flowers followed by white bladder-like fruits which, changing in color to pinkish and brown, are long retained. When known will become a favorite in American gardens." Arnold Arboretum adds: "One of those few woody plants which can be used either as a vine or as a shrub." Hardy to Boston.

Lilacs

We take pride in offering Leopold's three new varieties. These are now offered for the first time in this country and are not available elsewhere in the U. S. A. The descriptions below are word for word as furnished by Mr. Leopold & Son, in Saint-Étienne, France. We have not been able to find any information.

LEOPOLD'S LILAC (White, Sweet, Sprig) This variety is a most fragrant flowering, the flowers being sweetly scented. Every branch bears flowers in great abundance.

LEOPOLD'S LILAC (Blue, Sweet, Sprig) This variety bears flowers with dark blue and sweet fragrance. The flowers have a novel shape, elegant, white, and of the very sweetest fragrance.

LEOPOLD'S LILAC (A fragrant variety, with flowers of a light blue color, sweet fragrance, and flowers in great abundance. The flowers are very fragrant, and the foliage very dense and glossy.

GENERAL COLLECTION

We are very sorry to have to disappoint our customers this year, but as a result of limited propagation during the depression our stock of all sizes from one to four foot plants is very limited, so much so that orders booked during the summer have absolutely exhausted our supply; in fact, we already have more orders than we have plants.

In larger sizes we have a very limited number of plants in choice named varieties at the following prices:

8 to 10 ft. B (Leon Gambetta only)	6.00	
6 to 7 ft. B Assorted	3.50	3.00
5 to 6 ft. B Assorted	3.00	2.50
4 to 5 ft. B Assorted	1.75	1.50

PILEOSTEGIA viburnoides (new)			
Excellent evergreen climber for shady location. Leaves like English Laurel; flowers white in large loose umbels in late summer.			
4 in. pot 4 to 6 in. C.....	.35	.30	
WISTERIA japonica			
This is a rare vine of slender growth. Leaves are small, flowers greenish white. A distinct species and is not what is generally called "Japanese Wisteria".			
4 in. pot 1 to 1½ ft. G.....	.40	.35	

To Eastern Nurserymen

who have not been buying from us.

YOU SHOULD LOOK THROUGH THIS LIST CAREFULLY. While it contains much that is not adapted to climates more severe than ours, it also includes many things that thrive East but are not obtainable there or which can be propagated much better and more economically here.

If you have not bought of us before it may seem strange to send to the Pacific Coast for nursery stock, but many others do so EVERY YEAR to such an extent that our eastern business is steadily increasing.

Spring shipment to any eastern point is perfectly safe and practical via Southern Pacific R. R. to New Orleans, thence by rail, if destination is inland, or to Galveston and via steamer to Atlantic Coast points. We know how to pack properly for the long trip and the freight rate is just the same as if shipped direct over the mountains. This plan enables us to ship about March 1st while the stock is still dormant here, and to get it to you in good time for your spring selling season.

Also we shall ship two heated refrigerator cars in January; one to Boston via N. Y. C., the other to Philadelphia via Penn. R. R. Charges will of course be pro-rated among customers. These cars can be stopped at any point for partial unload at an extra cost of about \$6.00. This method effects a decided saving on freight charges where customer is on or near the main lines and order is large enough to justify it. If you want further information about this plan please write us.

On account of its weight, we do not recommend "balled" stock, but freight is not serious on deciduous and pot-grown items.

Your attention is called particularly to the following lines:

JAPANESE FLOWERING CHERRIES
FLOWERING FRUIT TREES in general
ABELIA, several kinds
BERBERIS verruculosa
CISTUS, several kinds
COTONEASTER, many kinds
CYTISUS, New Hybrid Brooms
ILEX—Grafted Hollies in pots and cans
NERIUM (Oleander) pot grown
PYRACANTHA, several kinds
RAPHIOLEPIS indica rosea
CRATAEGUS (Thorn) Paul's, Dbl. Pink & Dbl. White
LABURNUM vossi!!!
CHAENOMELES, Flowering Quince
(15 distinct forms)
WISTERIA. climbing
WISTERIA Standards (tree shaped)

By far the largest collection of Wisterias offered in this country!

Altho we do not list them herein we can always supply Boxwood Globes and Pyramids, Date Palms and Kentias in carload lots. Current prices quoted on request.

We solicit inquiries for anything in the nursery line produced on the Pacific Coast.

W. B. Clarke & Co.

San Jose, California

Grafted Wisterias

We have changed grading on Wisterias so that age specified is the actual age. 1 yr. means plants from the grafting beds. They then go to nursery rows and after one season there are graded as 2 yr., etc. We grow our Wisterias for blooming qualities, not for a mass of useless wood.

NOVELTIES

10 rate

100 rate

C 3 year G.....	1.50	1.25
D 2 year G.....	.90	.75
E 1 year G.....	.75	.60

Letters after varieties show sizes available.

floribunda longissima alba CE

Flowers pure white in clusters up to 2½ ft. long.

floribunda Geisha CE

Appearance unusually dainty. Both flowers and clusters are smaller than most kinds, but are charming. Color light lavender.

floribunda Royal Purple CDE

The best new Wisteria we have seen in years. Of the Japanese type and has the deepest purple flowers of all the single Wisterias, borne in well filled clusters of moderate length. Very precocious, blooming almost as young as Chinese.

GENERAL COLLECTION

floribunda (W. multijuga) ACDE

JAPANESE WISTERIA

All Wisterias of Japanese type are now referred to as W. floribunda instead of W. multijuga as heretofore.

floribunda alba DE

WHITE JAPANESE WISTERIA

floribunda carnea, BENI FUJI (flesh pink) AC

floribunda Issai CDE

Very fine variety which we imported from Japan in 1931. Probably a hybrid between W. floribunda and W. sinensis. Light purple. Both profuse and precocious.

floribunda Kyushaku CDE

Imported under government permit. In Japan the clusters are said to attain 4 ft. or more which is verified by photographs.

floribunda longissima ABCDE

EXTRA LONG JAPANESE WISTERIA

Introduced by us about ten years ago and now widely known. Clusters on well established plants attain 4 feet and even more.

floribunda rosea ABDE

PINK JAPANESE WISTERIA

This variety is genuinely pink. Beware of inferior strains. All our propagation is from our own blooming plants which bear beautiful pink flowers in long clusters.

floribunda violacea plena CDE

DOUBLE VIOLET WISTERIA

sinensis

Sold for this season.

sinensis alba CDE

WHITE CHINESE WISTERIA

sinensis nankingensis CD

MINIATURE WISTERIA

CLIMBERS

GRAFTED WISTERIAS (continued)

venusta alba DE

SILKY WHITE WISTERIA

Flowers very large, chalk white, fragrant.
Clusters short and broad.

venusta violacea CDE

The purple counterpart of *W. venusta alba*.
Much like Chinese in color but has light and
dark petals giving it a slightly mottled appear-
ance. A tremendous bloomer with large flowers
on long stems.

sp. Mrs. McCullagh ABDE

A rare and beautiful variety of uncertain
species. Flowers large purple in compact clus-
ters. The wood is very short-jointed making
this very desirable where space is limited.

Standard Wisterias

A splendid novelty we recently put on the
market. Stems are about 4½ to 5 ft. tall.

Roses

We grow bush and climbing roses extensively in a fine assortment of varieties and can also supply nearly all of the patented kinds. List is too long to be included here but will be sent on request. After orders already booked have been filled we will issue a revised list which will be mailed to all customers on the Pacific Coast and upon request to Eastern Nurserymen.

As for Standard Roses we are so nearly sold out that it doesn't seem worth while to list them, although we can still supply No. 1 grade in a few of the best kinds at 10 rate of \$1.15. Either leave assortment to us or specify colors only. We grow only the finest varieties.

Bird's IMPROVED NEPONSET Flower Pots

We are agents for Bird & Son's famous Neponset Paper Pots. The green pots, now greatly improved, are used for growing and the red (same as we use ourselves) for shipping.

Prices on green pots are at factory in Mass. Freight via Panama Canal is slight.

Prices on red pots include freight to any point in U. S. A. if ordered for shipment direct from factory. Otherwise f. o. b. San Jose. All prices are for unbroken case lots.

Size	Quantity per case	Weight per case	Price per 1000
